CISM143 : Introduction to Project Management

Provides students with concepts and techniques for managing projects in a wide range of industries and organizations. The course takes a decision-making, business-oriented approach to the management of projects, which is reinforced with current examples of project management in action. The course also addresses project management within the context of a variety of successful organizations, whether publicly held, private, or not-for-profit. Students are introduced to Microsoft Project, an industry standard project management computer application.
