

CISM215 : Ethical Hacking

This course teaches students about network attack strategies and common countermeasures. It prepares students to use various penetration testing tools to analyze computer networks for vulnerabilities. Knowledge of these vulnerabilities together with initiating an attack, will help students understand how to counter weaknesses and improve network security. The course covers the objectives of the TestOut Ethical Hacker Pro certification examination.

Credits 4

Lecture Hours 4

Lab/Clinical/Field Study Hours 0
