

CRIM/CISM262: Mobile Forensics Investigations

This course will familiarize students with mobile devices and technology used by carriers, and analyze the legal implications of using such devices as evidence in a court of law. Students will identify data that can be retrieved from mobile devices such as cellular phones, smartphones and GPS devices. Recovered and analyzed data will include address books, call logs, text messages, video and audio files and internet history. Students will correlate data with records from network service providers. Students will apply industry-recognized best practices to evidence collection and analysis with using current technology.

Credits: 4

Lab Hours: 0

Lecture Hours: 4

Prerequisites:

CISM125
