

RADX109: Clinical Radiography II

This course focuses on the radiographic procedures of the lower extremity, pelvic girdle and vertebral column. Students will experience hands-on instruction on the use of general and mobile radiographic equipment, while continuing to demonstrate previously mastered skills. The application of theoretical principles of body size measurement and trauma positioning will be practiced under the indirect supervision of staff technologist at affiliated medical and imaging centers.

Credits: 2

Lab Hours: 16

Lecture Hours: 0

Prerequisites:

RADX104

Co-Requisites:

RADX105, RADX106, RADX107, RADX108

Program: [Radiologic Technology](#)

Semester Offered:

Spring
